

# DICTIONARY

## Agenda:

- ↳ Intro to dictionaries
  - ↳ Need of dictionaries
  - ↳ Inbuilt methods on dictionaries
  - ↳ Questions on dictionaries
- 

★

## Dictionary:

Abode	→	"Home"
Apple	→	"A fruit"
House	→	"Home"
Kiwi	→	"A fruit"

key ←                      → values

★ Dictionary is key-value pair type of data-structure

★ Dictionaries are "ordered" in python version  
3.6 above

★ Dictionaries are "unordered" in python version < 3.6

★ Ordering means that when we put elements in a dictionary it is going to be stored in same ordered.
