Python Refresher 3

Agenda :

- → Strings
- → Tuples
- → Dictionaries
- → Sets

★ **String :**

\#   A sequence of characters.

\#   ' ', } single line string
     " ",

     " ", ``` } multiline strings
     """ """,

★ Tuples :

⇒ Tuples are more secure than list

⇒ Frozen data set : You don't want to change in its life cycle.
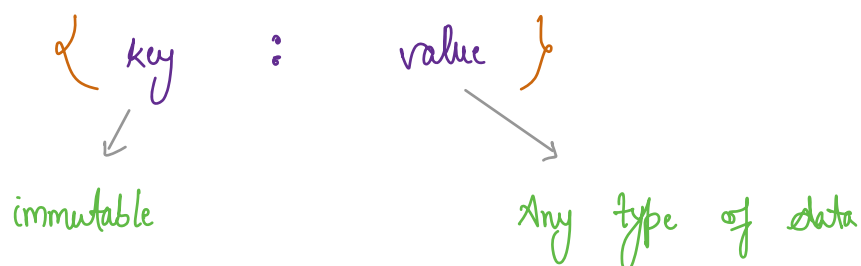

⇒ Tuples ≃ 10 x faster than lists

★ Dictionaries :

\# Dictionary has values in key, value pair.

\# d = { key : value }

\# Dictionaries are mutable

\# It follows principal / principle of hash map

{ key : value }

immutable   Any type of data

⇒   Ordered   >   3.7

2)   else it's   unordered
